

For Providers:

The PrEP Providers list includes HIV medical providers who have expressed interest in evaluating patients for HIV pre-exposure prophylaxis (PrEP) and whom are willing to prescribe PrEP to persons at high-risk for HIV infection. Public Health maintains this list on our website and medical providers in the community may be added to or deleted from the list at any time by sending an email to buskins@kingcounty.gov

Medical providers on the list should be willing to follow the published CDC PrEP guidelines. These guidelines include that:

- 1) PrEP is contraindicated in persons with unknown or positive HIV status or with an estimated creatinine clearance <60 mL/min;
- 2) PrEP should be targeted to adults at very high risk for HIV acquisition;
- 3) PrEP should be delivered as part of a comprehensive set of prevention services; and
- 4) PrEP should be accompanied by quarterly monitoring of HIV status, pregnancy status, side effects, medication adherence, and risk behaviors, as outlined in previous interim guidance.¹⁻³

1. US Public Health Service. Preexposure prophylaxis for the prevention of HIV infection in the United States – 2014: a clinical practice guideline. Published 5/14/2014. Available at <http://www.cdc.gov/hiv/pdf/PrEPguidelines2014.pdf>

2. CDC. Interim guidance: preexposure prophylaxis for the prevention of HIV infection in men who have sex with men. MMWR 2011;60:65–8. (Updated June 14, 2013 http://www.cdc.gov/mmwr/preview/mmwrhtml/mm6223a2.htm?s_cid=mm6223a2_w)

3. CDC. Interim guidance for clinicians considering the use of preexposure prophylaxis for the prevention of HIV infection in heterosexually active adults. MMWR 2012;61:586–9.

Public Health **further** recommends that medical providers discuss PrEP with all HIV-uninfected men who have sex with men being treated for rectal gonorrhea or syphilis, and that providers use either a 4th generation HIV EIA or an HIV RNA test when testing persons prior to PrEP initiation or as part of PrEP monitoring. Thank you for your ongoing efforts to prevent HIV in our community.

PrEP Providers List – Public Health – Seattle & King County

The following is a list of medical providers who have expressed a willingness to screen for, prescribe, and monitor pre-exposure prophylaxis (PrEP) for people at high risk of HIV infection.

Medical Providers:

Provider(s)	Clinic	Phone
Dave Holt, ARNP Jessica Rongitsch, MD Vy Chu, MD	Capitol Hill Medical	206 720 9999
Karen Johnson, ARNP Katie Hester ARNP	Country Doctor Community Clinic	206 299 1600
